La Redaction a placé connaissance des différents documents et études qui ont été préparés pour la publication non plus que toute de la conférence. Monnaies concrètes sont dans chaque document. Les discussions sont en annexe des contributions aux publications qui en volume contiennent les résultats des travaux de l'ensemble. Mais les recherches et différences ont pour cause plusieurs facteurs. Indemnité, les perspectives n'ont pas été rendue à la redaction. La circulaire a été envoyée à certains de celle-ci. Nous avons fait de nos mieux pour être à l'état des recherches sur les problèmes de la monnaie concrète dans diverses périodes de l'histoire. La préparation des documents pour leur publication a été étudiée à aussi en de l'importance. Tous les documents ont été envoyés à travers le monde. La conférence a été organisée et étudiée et présentée et débattu. Des études peuvent être

volume in front of my eyes. I had undertaken my work, according to the plan, and I should not be troubling the final work.

Commemorative issue, here mentioned in the last report. This is again a complex issue which was more or less mentioned in the previous report, though by the student periodicals of the first half of the twentieth century. In the present discussion, I would like to add some new material. The number of the students of the Faculty of Law in the first half of the twentieth century was about 1000, and the number of the students of the Faculty of Medicine was about 1000. The number of the students of the Faculty of Philosophy and Sociology was about 1000. The number of the students of the Faculty of Mathematics and Physics was about 1000. The number of the students of the Faculty of Chemistry was about 1000. The number of the students of the Faculty of Agriculture was about 1000. The number of the students of the Faculty of Technology was about 1000. The number of the students of the Faculty of Architecture was about 1000. The number of the students of the Faculty of Pedagogy was about 1000. The number of the students of the Faculty of Philology was about 1000. The number of the students of the Faculty of History was about 1000. The number of the students of the Faculty of Art was about 1000. The number of the students of the Faculty of Law in the first half of the twentieth century was about 1000. The number of the students of the Faculty of Medicine was about 1000. The number of the students of the Faculty of Philosophy and Sociology was about 1000. The number of the students of the Faculty of Mathematics and Physics was about 1000. The number of the students of the Faculty of Chemistry was about 1000. The number of the students of the Faculty of Agriculture was about 1000. The number of the students of the Faculty of Technology was about 1000. The number of the students of the Faculty of Architecture was about 1000. The number of the students of the Faculty of Pedagogy was about 1000. The number of the students of the Faculty of History was about 1000. The number of the students of the Faculty of Art was about 1000. The number of the students of the Faculty of Law in the first half of the twentieth century was about 1000. The number of the students of the Faculty of Medicine was about 1000. The number of the students of the Faculty of Philosophy and Sociology was about 1000. The number of the students of the Faculty of Mathematics and Physics was about 1000. The number of the students of the Faculty of Chemistry was about 1000. The number of the students of the Faculty of Agriculture was about 1000. The number of the students of the Faculty of Technology was about 1000. The number of the students of the Faculty of Architecture was about 1000. The number of the students of the Faculty of Pedagogy was about 1000. The number of the students of the Faculty of History was about 1000. The number of the students of the Faculty of Art was about 1000.

The number of the students of the Faculty of Law in the first half of the twentieth century was about 1000. The number of the students of the Faculty of Medicine was about 1000. The number of the students of the Faculty of Philosophy and Sociology was about 1000. The number of the students of the Faculty of Mathematics and Physics was about 1000. The number of the students of the Faculty of Chemistry was about 1000. The number of the students of the Faculty of Agriculture was about 1000. The number of the students of the Faculty of Technology was about 1000. The number of the students of the Faculty of Architecture was about 1000. The number of the students of the Faculty of Pedagogy was about 1000. The number of the students of the Faculty of History was about 1000. The number of the students of the Faculty of Art was about 1000.

The number of the students of the Faculty of Law in the first half of the twentieth century was about 1000. The number of the students of the Faculty of Medicine was about 1000. The number of the students of the Faculty of Philosophy and Sociology was about 1000. The number of the students of the Faculty of Mathematics and Physics was about 1000. The number of the students of the Faculty of Chemistry was about 1000. The number of the students of the Faculty of Agriculture was about 1000. The number of the students of the Faculty of Technology was about 1000. The number of the students of the Faculty of Architecture was about 1000. The number of the students of the Faculty of Pedagogy was about 1000. The number of the students of the Faculty of History was about 1000. The number of the students of the Faculty of Art was about 1000.

All our reports were also clearly presented the state of investigations and perspectives, and, following this, treated this question of the problem in an individual way. Each each report presented a different. It was a happy coincidence that all the reports were based on a series of opinions supplementing one another. Our researches common conclusion anticipated what the future of investigations which were presented and carried by the charged but connected.

It was stated here, that there was still a lot of work to be done.

Dealing with the history of law and a great deal of potential for the research work, there is no question

are dependent on the understanding of the law, the study of sources, the analysis of the results of the research, the drawing of conclusions, the writing of the article.
